

Quality Assurance Inspector

A growing Orange County Manufacturer is looking for its next Quality Assurance Inspector. This position is responsible for inspecting and testing all of the incoming products and components.

1. Candidates must satisfy the following criteria:

- You have at least 1 year of basic inspection experience using general inspection equipment.
 - Close-tolerance inspection
 - High-volume inspection a plus!
- You can read and interpret blueprints and drawings.
- You can speak, read and write English fluently.
- You can demonstrate an above-average mechanical aptitude.
- You can demonstrate your excellent ability to solve complex problems.
 - Finding/developing different ways to inspect difficult parts
- You are an above-average computer user (Microsoft office, able to quickly learn new software packages)
- You don't panic when presented with an urgent need or a short deadline.
- You can work overtime on short notice either before or after regular work hours.

2. If you can also satisfy these additional criteria, you should really consider applying.

- You have HVAC and/or plumbing experience.
- You have experience working in an ISO 9000 or AS 9100 environment.
- You have experience with SPC and/or other process control techniques
- You are interested in furthering your education.

3. If you can satisfy section 1, maybe some of section 2 and anything from these additional criteria, we want to hear from you .

- You have experience in a machine shop or manufacturing facility.
 - CNC Machining, Forging, Casting, Assembly
- You have attended and completed programs at a Technical College
 - NTMA Training
- You are currently engaged in further education
 - College
 - NTMA
 - Technical School
