Valve

Flow Control

## *When You Need Leading Edge Technology and Experience*

Griswold Controls has been solving your temperature and flow problems for the last 45 years, and we're continuing to do so.

We invented the original high-limit flow control cartridge; we gave you the first combination valve to include flow limiting control, a ball valve and a strainer in one housing; the first combination actuated control ball valve with automatic flow limiting control, and now the patent pending field repairable stem design.

You can continue to count on Griswold Controls to be at the forefront of technology in temperature and flow control.
