

Griswold Controls Puts You in Control

Griswold Controls' Unimizer® 2 and 3-way valves, available in 1/2" to 6" sizes, provide perfect temperature control anywhere actuated ball valves or globe valves are used. Unimizer valves:

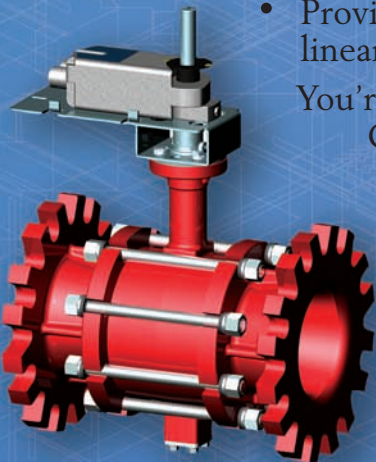

- Are low torque, requiring a less expensive actuator
 - Incorporate a universal mounting plate, offering compatibility with most manufacturers' actuators
 - Provide true equal percentage flow, resulting in linear heat transfer.

You're in complete control when you use
Griswold Controls' Unimizer valves.
